Sc. (Hons) and M. Sc. Classes and keeping this in view the present book is written for the students. Besides covering the syllabi, the publication is updated by incorporating important developments in the field, thus making it useful for the advanced reader too. The book is written in a simple language and the whole subject matter is split into twenty six chapters, each dealing with specific topics like gametogenesis, fertilization, parthenogenesis gastrulation, metamorphosis, regeneration, embryogenesis of herdmania, frog, and rabbit, development of chick and placentation in mammals etc. The arrangement of chapters is such that it is easily followed by the students. The text of the book is supported by simple and well labelled diagrams for an easy understanding." (jacket) 485 pp.
