TRICHOTILLOMANIA: AN ACT-ENHANCED BEHAVIOR THERAPY APPROACH WORKBOOK

Oxford University Press, USA. Paperback. Book Condition: New. Paperback. 96 pages. Dimensions: 10.8in. x 8.3in. x 0.4in. Trichotillomania (T. T. M.) is a complex disorder that is difficult to treat as few effective therapeutic options exist. Behavior therapy has the greatest empirical support, but the number of mental health providers familiar with T. T. M. and its treatment is quite small. This manual was written as a tool for therapists to become familiar with an effective treatment for T. T. M. . The treatment approach described in this guide blends traditional behavior therapy elements of habit reversal training and stimulus control techniques with the more contemporary behavioral elements of Acceptance and Commitment Therapy (A. C. T.). Unlike traditional interventions that aim to change type or frequency of pulling-related cognitions in the hopes of reducing urges to pull hair, this innovative program uses strategies to change the function of these cognitions. Clients are taught to see urges for what they really are and to accept their pulling-related thoughts, feelings, and urges without fighting against them. This is accomplished through discussions about the function of language and defusion exercises that show the client how to respond to thoughts about pulling less literally. Over the course of 10 weeks, clients learn to be aware of their pulling and warning signals, use self-management strategies for stopping and preventing pulling, stop fighting against their pulling-related urges and thoughts, and work toward increasing their quality of life. Self-monitoring and homework assignments keep clients motivated and engaged throughout. Treatments That Work T. M. represents the gold standard of behavioral healthcare interventions! All programs have been rigorously tested in clinical trials and are backed by years of research. A prestigious scientific advisory board, led by series Editor-In-Chief David H. Barlow, reviews and evaluates each intervention to ensure...
