

Essays and Surveys in Metaheuristics

Filesize: 2.37 MB

Reviews

The ebook is fantastic and great. I am quite late in start reading this one, but better then never. I am just effortlessly could possibly get a enjoyment of looking at a created ebook.

(Mr. Kevin Herzog)

ESSAYS AND SURVEYS IN METAHEURISTICS

Book Condition: New. Publisher/Verlag: Springer, Berlin | Finding exact solutions to many combinatorial optimization problems in business, engineering, and science still poses a real challenge, despite the impact of recent advances in mathematical programming and computer technology. New fields of applications, such as computational biology, electronic commerce, and supply chain management, bring new challenges and needs for algorithms and optimization techniques. Metaheuristics are master procedures that guide and modify the operations of subordinate heuristics, to produce improved approximate solutions to hard optimization problems with respect to more simple algorithms. They also provide fast and robust tools, producing high-quality solutions in reasonable computation times. The field of metaheuristics has been fast evolving in recent years. Techniques such as simulated annealing, tabu search, genetic algorithms, scatter search, greedy randomized adaptive search, variable neighborhood search, ant systems, and their hybrids are currently among the most efficient and robust optimization strategies to find high-quality solutions to many real-life optimization problems. A very large number of successful applications of metaheuristics are reported in the literature and spread throughout many books, journals, and conference proceedings. A series of international conferences entirely devoted to the theory, applications, and computational developments in metaheuristics has been attracting an increasing number of participants, from universities and the industry. | Preface. 1. Selected Topics in Simulated Annealing; E. Aarts, J. Korst. 2. Reactive Tabu Search with Path-Relinking for the Steiner Problem in Graphs; M.P. Bastos, C.C. Ribeiro. 3. A GRASP for Job Shop Scheduling; S. Binato, et al. 4. A Reactive GRASP for Transmission Network Expansion Planning; S. Binato, G.C. Oliveira. 5. Tabu Search for Two-Dimensional Irregular Cutting; J. Blazewicz, et al. 6. A Study of Global Convexity for a Multiple Objective Travelling Salesman Problem; P.C. Borghers, M.P. Hansen. 7. A Lower Bound Based Meta-Heuristic for the...
