RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 176 pages. Dimensions: 9.7in. x 7.4in. x 0.4in. This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1915 edition. Excerpt: . . . of slate and its accompanying schistose metamorphic phases. 1 LAMBERT SODA SPRINGS (TUOLUMNE 1). In the central part of the Sierra, near the crest of the range and about 100 miles south of the Lake Tahoe region, there is another region in which a number of carbonated springs rise. The northernmost of these that are worthy of note are the Lambert Soda Springs, near Tuolumne River, about 25 miles by trail and road northeast from Yosemite Valley. The springs rise at the northern edge of Tuolumne Meadows, about 125 yards north of the rivers edge, at the upper border of a grassy slope. There is only one spring of appreciable flow, but water bubbles from numerous vents near by. The spring rises in a funnel-shaped pool about 14 inches in diameter in a little log cabin that protects it. In August, 1909, it yielded...
